### Profile

I am a software engineer and trainer. I work especially with technologies such as React, Python and Flask. I develop projects in artificial intelligence, data analytics and frontend-backend web development. As a developer with a passion for both teaching and learning, I enjoy sharing my knowledge and discovering new technologies. I want to work to improve my problem-solving ability and take part in real-world projects. As a candidate who is open to learning, prone to teamwork and has analytical thinking skills, I aim to develop my knowledge and skills practically.

### Education

**Bachelor degree, Fırat Üniversitesi**

09/2021 – 06/2025  
Elazığ, Türkiye

### Languages

**English**

B2

### Professional Experience

**Python Tutor, Tutor**

08/2024 – Present  
Remote

I work as a Python tutor at Kodland, an international online education platform for children and teenagers. I teach students aged 10–17 the basics of Python programming. I explain coding concepts in a simple and fun way, using small projects and games. I also help students solve problems, improve their logic skills, and complete their final projects. I always try to make lessons interactive and interesting for each student.

**Software Developer, Stajyer**

07/2023 – 08/2023  
Erzurum, Türkiye

- I completed my mandatory summer internship at the 12th Regional Directorate of Karayolları, I improved myself in SQL and ASP.NET technologies.
